

## **Adherence to Community Standards**

### **Adherence to Community Standards**

The **Axis Journal of Scientific Innovations (AJSI)**, published by **AXIS EXPLORATION AND ACADEMICS (PRIVATE) LIMITED**, is unwaveringly committed to upholding the highest standards of integrity, ethics, and academic excellence. This commitment is the foundation of our mission to provide a respected, transparent, and inclusive platform for our authors, reviewers, readers, and the global scientific community. The following principles underpin all aspects of our operations and publications.

### **Integrity and Authenticity**

AJSI mandates that all research submissions are authentic and represent the original work of the authors. We maintain a zero-tolerance policy towards academic misconduct, including plagiarism, data fabrication, data falsification, and any other form of dishonesty that undermines the trustworthiness of scientific innovation.

### **Ethical Compliance**

Research involving human participants or animals must adhere to the highest international ethical standards. This includes obtaining formal approval from an institutional review board or ethics committee and ensuring informed consent is secured from all human subjects. Manuscripts must explicitly detail these approvals, reaffirming our commitment to responsible and ethical research practices.

### **Objective Peer Review**

AJSI ensures an equitable, rigorous, and constructive double-blind peer-review process. Submissions are evaluated purely on their scientific merit, originality, and significance to the field of innovations and inventions. This commitment to impartiality safeguards the integrity, quality, and credibility of the research we publish.

### **Transparency and Open Science**

AJSI is a strong advocate for the principles of open science. We encourage authors to share their data, code, and research materials in suitable public repositories to enhance the reproducibility of results, facilitate collaboration, and accelerate scientific progress through transparent scholarly discourse.

### **Disclosure of Conflicts of Interest**

Transparency regarding potential conflicts of interest is required from all participants, including authors, reviewers, and editors. Full disclosure of any financial, personal, or professional relationships ensures that these interests do not unduly influence the editorial and peer-review processes, thereby maintaining objectivity.

### **Diversity, Equity, and Inclusion**

Our journal is committed to fostering a diverse, equitable, and inclusive environment. We recognize that a multiplicity of perspectives, backgrounds, and experiences is crucial for driving true innovation. We actively strive to give voice to underrepresented groups in science and technology within our editorial board, reviewer pool, and published articles.

### **Continuous Improvement and Community Engagement**

AJSI is dedicated to the continuous monitoring and enhancement of our adherence to these community standards. Feedback from the scientific community is invaluable in this ongoing process, ensuring our policies and practices evolve to meet the highest expectations of ethical academic publishing.

AJSI's adherence to these community standards is pivotal in ensuring the trustworthiness, relevance, and impact of the research we publish. Our unwavering commitment to these values supports the integrity of the scientific record and contributes positively to the advancement of global scientific innovation.
